NEW!

**Visual impact from safety footwear
which stands out from the crowd**

Sold exclusively through the Buckler Boots/Buckbootz dealer network

Welcome

to your copy of the Buckler Boots 2019/20 autumn/winter brochure

Buckz Viz S3 HRO SRC Non-metallic

High visibility, waterproof, injection moulded safety boots

Win, Win, Winner!

The recent introduction of Buckler Boots **Buckz Viz** safety boots in three styles has reinforced our reputation as the go to independent safety footwear brand for design and component innovation in eye catching styles.

On the front cover and page 3 of your copy of 2019/20 autumn winter brochure you will see that we are introducing the two Buckz Viz lace styles in the new dark brown leather/orange Cordura® colour combination.

For EN read UKSA

It now looks as if there will be a post Brexit UK standards authority involved in the standards certification procedure for safety footwear sold in the UK. Hopefully this will completely dovetail with EN standards - I could say watch this space but will understand if your concentration lapses.

Enduring Success

Just as Buckler Boots has become synonymous with the creation of Buckbootz, Europe's first ever EN S5 neoprene/rubber safety boots, it is also true to say that

our leather signature product is the **B1150** safety dealer boot which celebrates its 21st birthday this year. It isn't possible for us to prove it but we are happy to think that the B1150 is probably the most reliable and durable outdoor safety boot of its generation. We pay due tribute to B1150 on pages 20 and 21 and give advance notice of the arrival of the **B1150 MAX**.

We also pay tribute to another much mimicked Buckler Boots design on page 25, **B301**. This is the type of no-nonsense rugged, comfortable workhorse which any brand worth its salt would love to have in its stable.

Don't just take our word

On page 35, you'll see a selection of testimonials from wearers of some of our waterproof styles. If you have a story you would like to share with us, send us a message via one of our social media channels or email info@bucklerboots.com

Kind regards,

Andrew Duncan,
Managing Director, Buckler Boots Ltd

Sole Patterns - Our Heart and Soles

There has never been a Buckler Boots style which hasn't featured rubber outsoles

Buckshot 2 S3 HRO SRC

Premium grade injection moulded safety footwear

For us there is no compromising, we can't see past rubber as the prime work boot sole material and we invest heavily in our own rubber outsole development programmes.

Rubber is tough, durable, stays flexible in a wide temperature range and is abrasion, slip, heat (300°C – 60 secs) and oil resistant. It also provides superior grip in nearly every conceivable working situation and is resistant to a number of chemicals.

All the rubber outsoles you can see here have been developed by or in conjunction with Buckler Boots. If you think you've seen other soles which look a bit like them then it's probably because some of our competitors have seen and liked them too.

K2

Originally Buckler Boots signature outsole for Goodyear welted boot styles. Probably the toughest sole of its kind available. K2 put down new markers for strength and durability in work boot outsoles. Certified to SRA anti slip standard.

K3

The new generation sole for Goodyear welted leather styles and Buckbootz neoprene/rubber footwear. Features weight saving wave effect sipes and inherits K2's rugged long life characteristics whilst also achieving SRC maximum anti slip test certification. Looks good too.

Buckshot 2

The most exciting Buckler Boots outsole development for some time. Buckshot 2 is featured on our injection moulded Buckshot 2 boot range. It has some of the best anti-abrasion test results achievable. A great looking sole with wave effect sipes, deep cleats and all the outsole benefits which come with rubber plus SRC maximum anti-slip test certification.

Nubuckz/Buckz Viz

For our ground breaking new injection moulded Nubuckz and Buckz Viz safety boot styles we introduce a deep cleated rubber outsole specially designed to interact with the polyurethane top sole in which the ribbed anti scuff toe is an incorporated and defining feature. Nubuckz and Buckz Viz outsoles are heat resistant to 300°C and achieve maximum rating SRC anti slip certification. They are long lasting with rugged good looks.

Buckshot BSH011 higher leg boot

For those users who like a higher leg boot style we introduce Buckshot BSH011, a safety boot with real attitude and extra all-round wearer protection.

Everything about Buckshot BSH011 makes a statement - the combat boot profile, the distinctive upper design features, the supertough anti-scutt cap, the beefy sole and the extensive EN standards and waterproof specification. This is a boot which begs to be put to the test.

WIDER FITTING

NEW! Available January 2020

B1150 - A legend in its own lifetime

In 1998 Buckler Boots introduced a very special safety boot, the **B1150** dealer style. B1150 brought rugged construction to rugged good looks in a boot design which struck a chord with users working in tough environments like few work boots have ever achieved.

In 2008 we created the Buckflex feature for dealer style boots which made the fitting and removing even more wearer friendly. B1150 was fitted with this feature which is a Buckler Boots protected design so when you see one of the many B1150 lookalikes on the market, if it doesn't have Buckflex it isn't a B1150.

Everyone knows that you tamper with market leading designs at your peril. However it's a fact of life that feet are getting bigger and wider which is why we have been fitting wider safety toecaps to B1150's stablemates for some years now. We have also introduced our wave tread K3 outsole on these styles. This sole has proved to be every bit as durable and reliable as the B1150's original K2 sole and comes with considerable weight saving and so we bring a wider toecap and lightweight outsole together to create a new B1150 - the **B1150 MAX**. A safety boot which will suit even more of your customers right down to the ground.

Your boot saved my foot!

When we look back at the many testimonials we have received from Buckler Boots wearers who have had feet saved thanks to our products, B1150 stands out for its ability to withstand impact and sole penetration in a way which exceeds the requirements of EN standards protection.

You know that when you recommend B1150 to your customers you are pointing them in the direction of the safety boot which goes the extra mile for safety comfort, durability and nicely understated good looks.

Some examples of B1150 testimonials:

Pete Clark, Buckler Boots dealer BRM Ltd - *"I was pushing my boot on the bar with the spring on. My foot got trapped between the two red plates which are pushed by a hydraulic ram. All I can say is I am really happy I had my Buckler safety boots on. They definitely saved my foot from serious damage. I walked away without a scratch."*

Mark Statton in Morpeth, Northumberland - Mark was wearing Buckler Boots B1150 safety dealer boots which withstood the impact and saved his toes. Mark's mother relayed the story to us and there's no better way to convey the details of what happened than to quote her words:

"Mark is on the mend now, he's just had all the wires taken out of his foot and undergoing physio now to walk again. The boot saved his toes and the foot kept in shape even though it was crushed. The boot that was damaged as you will see has done its job with only the toecap moving slightly."

HARD AS NAILS

Goodyear Welted Safety

Traditional premium quality leather safety footwear

B301. The frequently mimicked* Goodyear Welted steel toecap/steel midsole style which inspired the launch of our Hard as Nails® range back in 2002. B301 is the type of no nonsense, rugged, comfortable workhorse which any brand worth it's salt would love to have in its stable.

Footbedz™ Insoles

- Don't let poor quality insoles come between your customers' feet and total footwear comfort. Footbedz™ are designed to make Buckler Boots a joy to wear. After all the insoles are the points of contact which carry the total body weight so they are the vital component in ensuring that wearers get optimum comfort and support. Footbedz™ are constructed in a triple layer format featuring a breathable polyester top layer, comfort cushion middle layer and non-slip latex base layer with activated carbon. Footbedz™ immediately mould perfectly to any foot shape and bring new levels of comfort, freshness and deodorising.
- Sizes 6/40 to 13/47 in full sizes. No minimum quantity.
- RSP £5.40 (+VAT)

Buckler Boots Leather Gel

- Nourishes and nurtures all footwear leathers using a special blend of beewax and coconut oil which also greatly improves water resistance and restores colour.
- Dealer pack: 12 x 200ml spray cans per carton.
- RSP £5.50 (+VAT)

Just wanted to say a MASSIVE thank you. ...I have finally found some boots that are up to the task. Was sick and tired of buying boots only to have them split/leak within 4 weeks of solid use. Have had a pair of **B701SMWP** safety rigger boots for 4 months now and they're so comfortable and can take any abuse the cattle can throw at them. Next pair of boots will definitely be another pair of Bucklers, just not too soon I hope!
Adrian Shaw, Albert Hall Farms

Do you have a story you'd like to share? Email info@bucklerboots.com or send a message to one of our social media channels.

They are without question the best, most comfortable boots I've ever owned which is why I was so gutted the wretched fox got to them. They are a superb product.
Mr. Matthew Wilson of Channel 4's The Landscape of his B601SMWP rigger boots

I've been wearing **BSH002** for 2 months and there's been no breakdown of the sole, the scuff toe is immaculate and they're very flexible, are great for driving and offer excellent grip in the wash bay.
Keiran Anderson, Buckler Boots dealer HRN Tractors Turriff

BBZ6000 fan Rik Williams from Wigan posted this interesting picture on Instagram of him climbing in the Lake District wearing his BBZs ("Buckbootz - best boots I've got") but even we have reservations about the wisdom of cliff climbing in wellies. It looks as if a pair of knee pads would come in handy too.

The **BBZ6000** boots are a superior product and the answer to much that has been wrong with previous waterproof safety footwear with which my team has been issued.
Graeme Hedger, Team Leader - Flood Risk Management at West Lothian Council
